

! Important information when using alternative cartridges for Canon 056 and Canon 057

We congratulate you for choosing our high-quality and ecological alternative to the original.

Since there are currently worldwide no new or remanufactured chips available for these models, alternative cartridges only work with used original chips and a small restriction.

After inserting the cartridge the following status message appears:

„End of life of the cartridge. Replacement recommended.“

You can ignore this message and print as usual. The toner level indicator in the toner cartridge just doesn't work.

```
*****  
*** Statusber. Verbrauchsmat. ***  
*****
```

Informationen zur eingesetzten Patrone

Schwarz:	
Stand:	□□□□□□□□ 0%
Warnung:	Keine Garantie für Druckqualität. Patronenaust. empfohlen.

As soon as the printouts become noticeably lighter, your cartridge has reached the end of its cycle and you should replace the cartridge.

We thank you for your understanding and look forward to doing something for the environment together!
